inside and outside the stores.

TrolyWipe

SANITIZER FOR SHOPPING TROLLEYS

In this moment of emergency due to Covid-19 pandemic, sanitizing everything that you touch with your hands is essential. Not that before it wasn't, but now attention is inevitably greater, which is why sanitizing environments and objects has become a priority. Nothing escapes this practice, from personal items to public objects which are daily used by lots of people, **such as the shopping carts**.

IT TAKES JUST **5 SECONDS** TO SANITIZE THE HANDLE, THE CUSTOMER'S HANDS AND THE TROLLEY!

Not to mention customers who go shopping with their young children; as we all know, when they go to the supermarket with their parents, children are usually seated in the back of the shopping trolley facing their parents and therefore in close contact **with the handle of the trolley, where the microbial concentration is highest**.

In order to make the shopping time quiet and at zero-risk, sanitizing the shopping carts is a **GOOD OPPORTUNITY**, as well as being a **GOOD HABIT**, in order to give customers a **VERY APPRECIATED** service and an excellent opportunity for large-scale distribution stores and small retailers.

IN **72%** OF CASES, FECAL BACTERIA, SALMONELLA AND CONTAGIOUS AGENTS, AMONG THE MOST AGGRESSIVE AND RESISTANT WHICH ARE THE CAUSE OF DIFFERENT INFECTIONS, WERE DETECTED (**ESPECIALLY ON THE HANDLE OF THE TROLLEYS**).

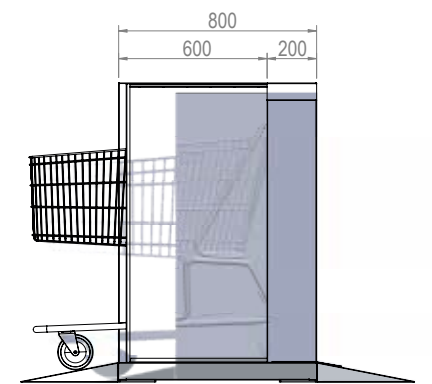

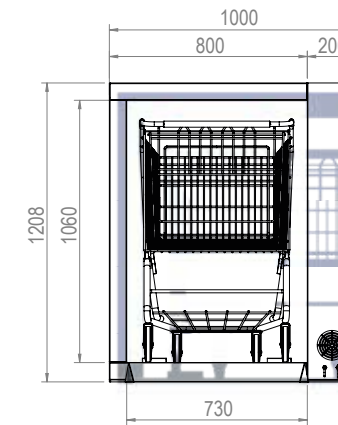

AVAILABLE MODELS

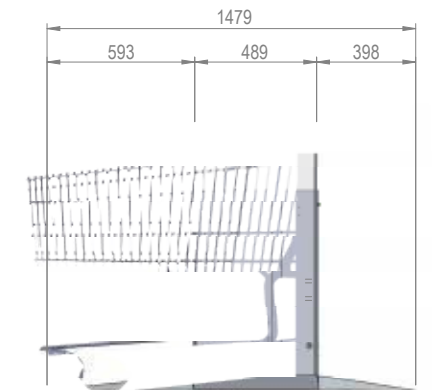

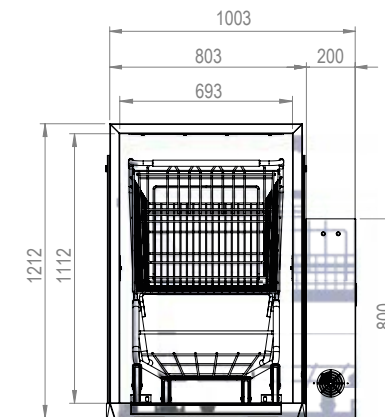

AVAILABLE RIGHT AND LEFT MODELS AND CUSTOMIZED DIMENSIONS ARE POSSIBLE ON REQUEST.

TROLYWIPE BIG - Model 3172521 for outdoor use with ready-to-use sanitizing product and a charge of 20 liters; it can sanitize up to 1,000 trolleys. It requires power supply.

TrolyWipe

SANITIZER FOR SHOPPING TROLLEYS

OPERATION AND MAINTENANCE

The cycle starts when the presence sensor detects the movement of the trolley. The person must insert the trolley inside the TrolyWipe up to the limit switch, after waiting for 5 seconds and once the liquid has been dispensed, the trolley can be extracted according to the installation methods. The two lights at the top of the box, red and green, indicate the operating status of the TrolyWipe.

The extraction of the trolley can be made in two different ways:

A entry and exit are on different sides.

MODE A

B entry and exit are on the same side.

MODE B

MAINTENANCE is very simple and reduced to the minimum effort: when the red light flashes, you need to restore the sanitizing liquid; every 6 months the spray nozzles must be replaced regularly.

01/ **STEADY GREEN LIGHT:** TROLYWIPE IS READY FOR USE.

02/ **FLASHING GREEN LIGHT:** TROLYWIPE IS IN STAGE OF SANITIZATION.

03/ **FLASHING RED LIGHT:** TROLYWIPE IS IN RESERVE.

04/ **STEADY RED LIGHT:** TROLYWIPE IS WAITING FOR REFILLING THE SANITIZING LIQUID.

Platform with mat to absorb any excess liquids.

CERTIFICATIONS

Each TrolyWipe product is completely **MADE IN ITALY** and **CE EN 60335-1 CERTIFIED**.

Tre Elle company offers the possibility to choose between 3 types of sanitizers according to the customer's needs:

1 / Alcohol-based dilutable at 15%;
